

Quality Access Doors- FAST!

SUBMITTAL/TECHNICAL DATA SHEET

DESCRIPTION

The access panel consists of aluminium profiles, a hardie board insert and a round cylinder lock with key. Both, an outer and an inner frame of the access panel consist of four single frames, which are firmly connected due to a special welding process.

The access panel is equipped with a safety-system against accidental opening. In order to avoid accidents, this safety-system has to be secured after each opening. A joint gap of 1/8" (3mm) is visible between outer frame and door leaf, which is equipped with an innovative brush joint (air-tight and dust resistant) and, in addition, with a special joint (water resistant). Access panels for facades in the outer area are applicable for direct mounting into solid walls (without external wall insulation system) or for installation into a wall insulation system (foam sealed).

ADVANTAGE

- Economical solution
- Delivery at short notice on request
- Quick and easy assembly
- Solid aluminum frame
- Sophisticated solution
- Flush installation in facades

OPTIONS

- Screwdriver operated cam latch
- Screwdriver operated four-square cam latch
- Round cylinder lock with key
- Mortise cylinder lock preparation
- Hex head cam latch
- Pinned hex head cam latch

CUSTOMIZED SOLUTIONS

Customized sizes can be produced in every dimension upon request.
