

Quality Access Doors - FAST!

SUBMITTAL/TECHNICAL DATA SHEET

DESCRIPTION

The access panel consists of aluminium profiles, a Hardie Board insert and a round cylinder lock with key. Both, an outer and an inner frame of the access panel consist of four single frames, which are firmly connected due to a special welding process.

The access panel is equipped with a safety-system against accidental opening. In order to avoid accidents, this safety-system has to be secured after each opening. A joint gap of 1/4" (3 mm) is visible between outer frame and door leaf, which is equipped with an innovative brush joint (air-tight and dustresistant) and, in addition, with a special joint (water resistant). Access panels for facades in the outer area are applicable for direct mounting into solid walls (without external wall insulation system) or for installation into a wall insulation system (foamsealed).

ADVANTAGES

- Economical solution
- Delivery at short notice on request
- Easy and quick assembly
- Solid aluminium frame
- Sophisticated solution
- Flush installation in facades
